

## **AMENDMENTS TO THE CLAIMS**

**Claim 1 (Currently Amended)**      A two-dimensional image display device comprising:

a red light source for emitting red light;

a green light source for emitting green light;

a blue light source for emitting blue light; and

a means for forming a two-dimensional image by using the red light, the green light and the blue light lights emitted from the respective red, green and blue light sources ~~of the three colors;~~

wherein ~~a~~ the center wavelength of ~~the said~~ blue light emitted from the blue light source is not less than 420 nm ~~420nm~~ and is not larger than 455 nm, ~~455nm~~

wherein a center wavelength of the red light emitted from the red light source is not less than 635 nm and is not larger than 655 nm,

wherein a center wavelength of the green light emitted from the green light source is not less than 505 nm and is not larger than 550 nm,

wherein a ratio of the blue light emitted from the blue light source to the green light emitted from the green light source during a white display is not less than 0.5:1 and is not larger than 4:1, and

wherein a ratio of the red light emitted from the red light source to the green light emitted from the green light source during the white display is not less than 0.4:1 and is not larger than 1.3:1.

**Claims 2-5 (Cancelled)**

**Claim 6 (Currently Amended)**     The ~~A~~-two-dimensional image display device as defined in Claim 1, wherein the center wavelength of ~~the said~~ blue light emitted from the blue light source is not less than 440 nm ~~440nm~~ and is not larger than 455 nm ~~455nm~~.

**Claim 7 (Currently Amended)**     The ~~A~~-two-dimensional image display device as defined in Claim 1, wherein the center wavelength of ~~said the~~ blue light emitted from the blue light source is not larger than 440 nm ~~440nm~~.

**Claim 8 (Currently Amended)**     The ~~A~~-two-dimensional image display device as defined in Claim 1, wherein ~~said the~~ blue light source is a semiconductor laser based on gallium nitride.

**Claim 9 (Currently Amended)**     The ~~A~~-two-dimensional image display device as defined in Claim 1, wherein ~~said the~~ red light source is a semiconductor laser based on AlGaInP.

**Claim 10 (Currently Amended)**     The ~~A~~-two-dimensional image display device as defined in Claim 1, wherein the red light, the green light and the blue light emitted from the respective red, green and blue ~~each light sources source has have~~ a spectrum width that is equal to or smaller than that of a semiconductor laser source.
